## DT SCREENS – OUR STORY

**Display Technologies** Screens fuse the highest technical specification and performance with the greatest ease of install on the market.

DT Screens provide a comprehensive range of solutions offering total flexibility in size and aspect ratio. The combination of meticulous design, premium components and bespoke manufacturing allows DT Screens to deliver on our promise of performance and ease of use.

DT Screens are already a feature component of some of the highest performance home cinemas. Choose DT Screens to maximise the performance of your chosen projector for years to come.

## CONTEMPO – MICRO FRAME SCREE

### Contempo:- Following or showing the latest style

DT Screens Contempo range is a modern take on fixed frame projection screens. With a 2mm bezel and at just 32mm deep, Contempo delivers a minimalist style that fits into all design schemes.

The clean edges and front mount fabric system mean that Contempo is equally at

home mounted on wall or fitted into a tight recess.

Contempo is available with all DT Screens surfaces and can be specified in any size or aspect ratio up to 5.1m wide.

## FRONTIER – MODERN VELVET FRAME SCREEN

**Frontier:-** The limit of knowledge or the most advanced achievement in a particular field

DT Screens Frontier range updates the classic velvet border fixed frame projection screen with a flatter 69mm bezel featuring gently radiused edges and at just 36mm deep, Frontier delivers a classic style that fits in to all design schemes.

The beautiful dark velvet frame and front

mount fabric system mean that Frontier is equally at home mounted on wall or fitted in to a recess.

Frontier is available with all DT Screens surfaces and can be specified in any size or aspect ratio up to 5.1m wide.

## DYNAMIC – MULTIWAY MASKING SCREEN

**Dynamic:-** Of or relating to force related to motion.

DT Screens Dynamic range is the premier example of motorised masking projection screen design. With a unique 200mm two-part bezel design and starting at just 100mm deep, Dynamic delivers an unbeatable combination of visual style and performance masking that will grace any home cinema.

The beautiful dark velvet frame and front mount fabric system mean that Dynamic is

easily mounted and aligned on wall and can be easily fitted tight to walls and ceilings to maximise the big screen experience.

Dynamic models are available with side by side, top and bottom, four way and art work masking. Dynamic is available with all DT Screens surfaces and can be specified in any size or aspect ratio up to 5.1m wide as standard. Larger sizes are available pending site survey.

## SCREEN FABRIC

### AT Reference

Acoustically Transparent Reference is the finest acoustically transparent screen surface on the market. AT Ref delivers crisp vibrant images with minimal impact on sound transfer. Available on screen heights up to 1.9m.

Surface structure indistinguishable from approximately 0.5m. Detailed analysis of audio and video parameters can be found at [www.dt-screens.com](http://www.dt-screens.com)

### AT XL

Acoustically Transparent XL is a high performance acoustically transparent screen surface available in very large sizes. AT XL delivers sharp bright images with minimal impact on sound transfer. Available on screen heights up to 4.5m.

Surface structure indistinguishable from approximately 2.0m. Detailed analysis of audio and video parameters can be found at [www.dt-screens.com](http://www.dt-screens.com)

### AT Mask

Acoustically Transparent Mask is a lightweight semi plush fabric which is used for contrast enhancing black backing on all ranges and as screen masking on the Dynamic range. The deep black and light absorbing finish enhance video performance with negligible impact on sound transfer.

Detailed analysis of audio and video parameters can be found at [www.dt-screens.com](http://www.dt-screens.com)

## MOTOR CONTROL

### FMSC

Flexible Masking System Control from DT Screens is an advanced and scalable control solution used on all models in the Dynamic range.

The system supports multiple motors, numerous preset mask locations and simple adjustment. FMSC is supplied with RS232 interface as standard which can be easily extended to IR, IP or even WiFi.

Full details of the FMSC can be found at [www.dt-screens.com](http://www.dt-screens.com)
